

Heat Release Tape Nitto "Revalpha"

May be purchased online at www.semicorp.com

REVALPHA is a unique adhesive tape. Adhesion equivalent to a normal adhesive tape at room temperatures, and can be easily peeled off when required, simply by heating. As tape removal is guaranteed at a uniform temperature, higher levels of labor-saving automation can be achieved. There is no damage to the substrate when removing tape.

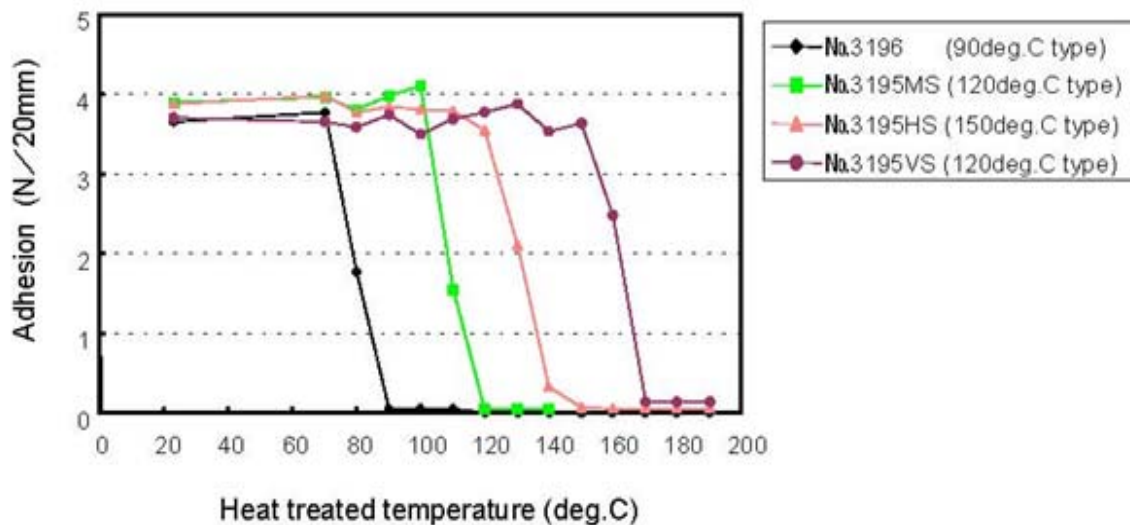

- Single sided
- Double sided
- 90°, 120°, 150° and 170° release temperatures.
- Adhesion levels from 2.5 to 7.4 n/20mm

SEC stocks a full line of heat release sheets at 300mm x 300mm.

Change in Adhesion by Heat Temperature
